## CyberLock System

There are four different ways to manage your CyberLock system: EntryPoint<sup>®</sup>, Lite, Professional, and Enterprise. All use the same CyberLocks and CyberKeys<sup>®</sup>.

### EntryPoint<sup>™</sup>

EntryPoint is a hardware-only system; no software is required. A complete system requires locks, keys, and a Grand Master.

### CyberAudit<sup>®</sup>-Web Lite

CyberAudit-Web Lite is a PC or Mac software program with basic access control features. A complete system requires locks, keys, a Grand Master, an IR Encoder, and Lite software. Intended for systems up to 50 locks and 50 keys.

CAL-100 CyberAudit-Web Lite software, PC or Mac

Starter kit for CyberAudit-Web Lite

(Contains one lock, one key, one Grand Master, one IR Encoder, and the Lite software.)

### CyberAudit Professional

CyberAudit Professional is a Windows program that installs on a local PC. A complete system requires locks, keys, a CyberKey station and/or Authorizer<sup>®</sup>, a CyberLock Programmer and/or USB Programmer, and the Professional software (NOTE: Professional software includes one CyberLock Programmer). Intended for systems up to 500 locks and 500 keys.

CAS-100 CyberAudit Professional

Starter kit for Professional

(Contains one lock, two keys, a CyberKey station, serial port cable, and the Professional software with CyberLock Programmer included.)

### CyberAudit-Web Enterprise

CyberAudit-Web Enterprise is web-based software installed on an application server. A complete system requires locks, keys, the Enterprise server, and one or more communicator devices. Intended for large or geographically widespread installations.

Enterprise software
